Browse redesign flows

Each page is one flow. The frames are rendered from the interactive prototype, in the app's dark color scheme. Codes such as S7 point to rows in the epic's parity checklist.

Interaction to the next frame · Element the user taps · 1 Annotation, explained under the frame · S7 Parity checklist row

Three tabs and a media chip row

Browse has three tabs. A chip row under the tabs picks the media type. The top bar actions change with the tab.

Sources · All

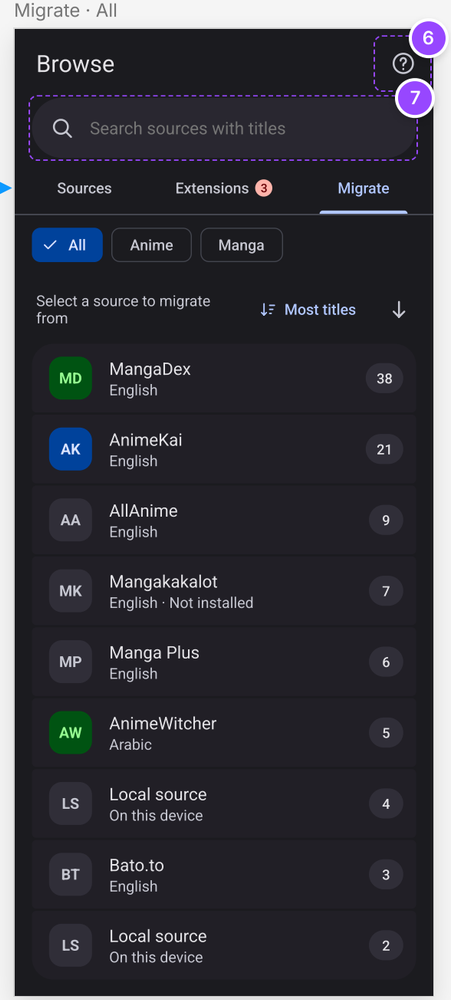

Tap tab

Extensions · All

Tap tab

Migrate · All

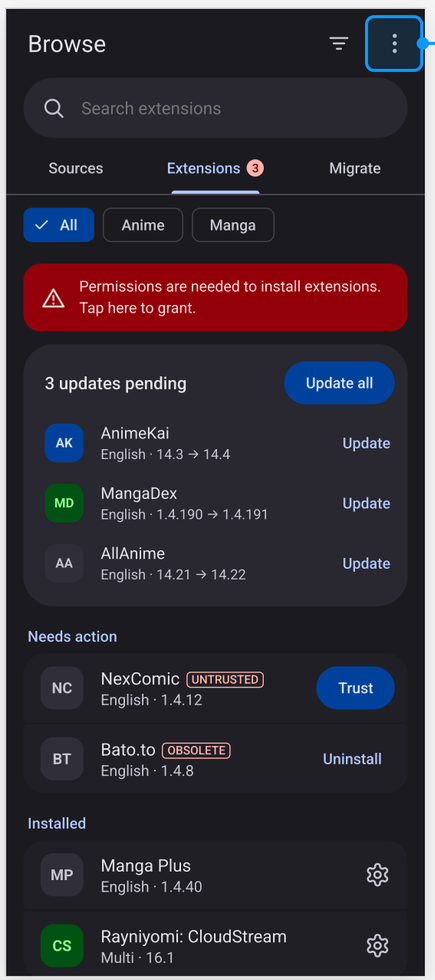

1. Three tabs replace the six to eight flat tabs. B1
2. The chip row picks the media type. Each tab supplies its own chips. All ships with R1230, R1231 and R1233. B1
3. Sources shows Filter only. No overflow menu. B6
4. The badge counts pending updates for every media type. B1
5. Extensions keeps Filter and the overflow with Extension repos. B7
6. The migration guide help action moves to the top bar. No overflow menu here. B8
7. One search field filters the current tab and chip. B4

R1229 #1513 · Three tabs and a media chip row · Flow 2

Extensions overflow

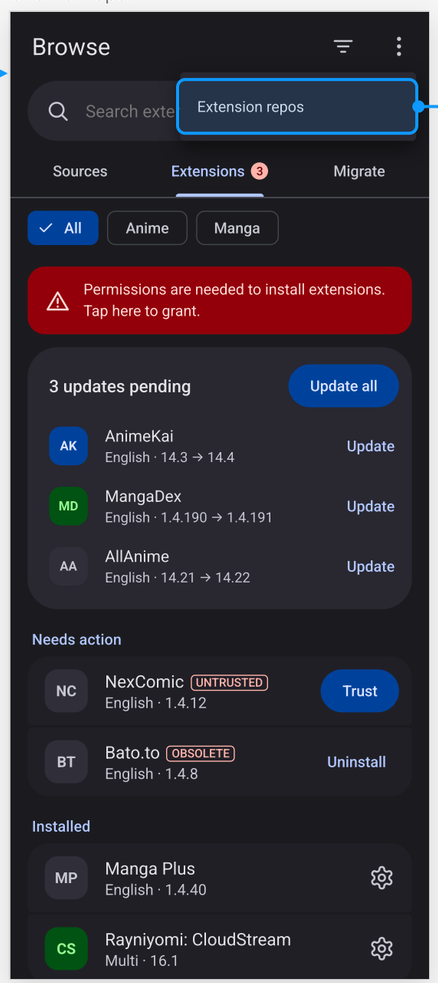

The overflow on Extensions has one item, Extension repos. The repos screen does not change.

Extensions

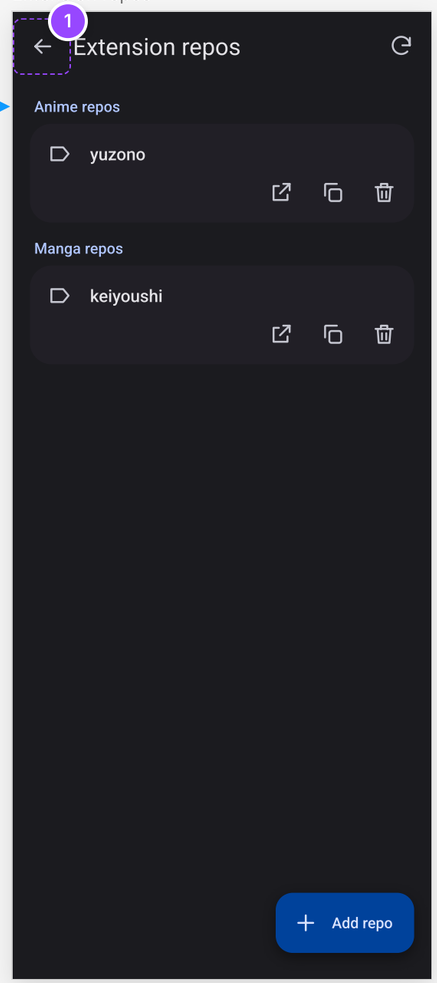

Tap

Overflow open

Tap

Extension repos

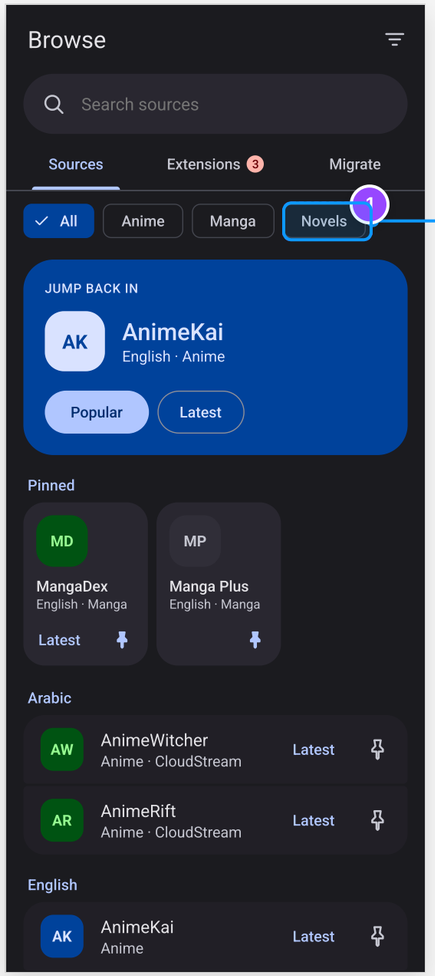

1 Same screen as today, reached from the overflow. R1

Novels chip

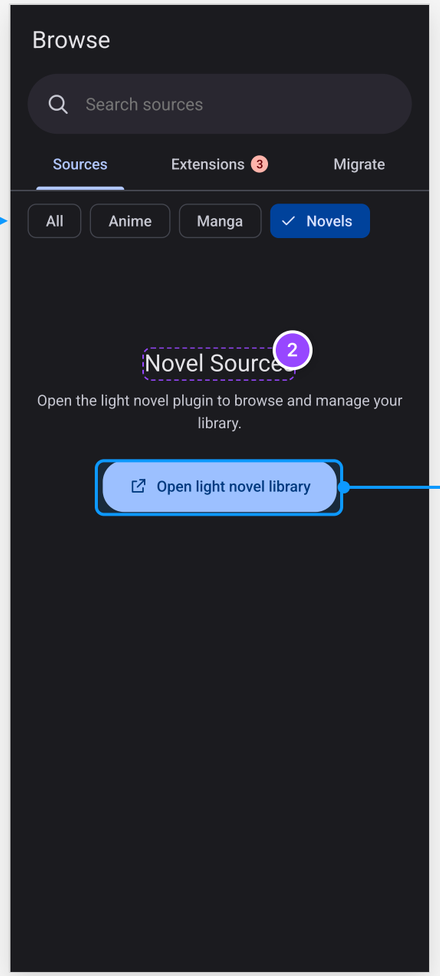

With the light novel plugin ready, Sources adds a Novels chip. It shows the existing launcher panel.

Sources · plugin ready

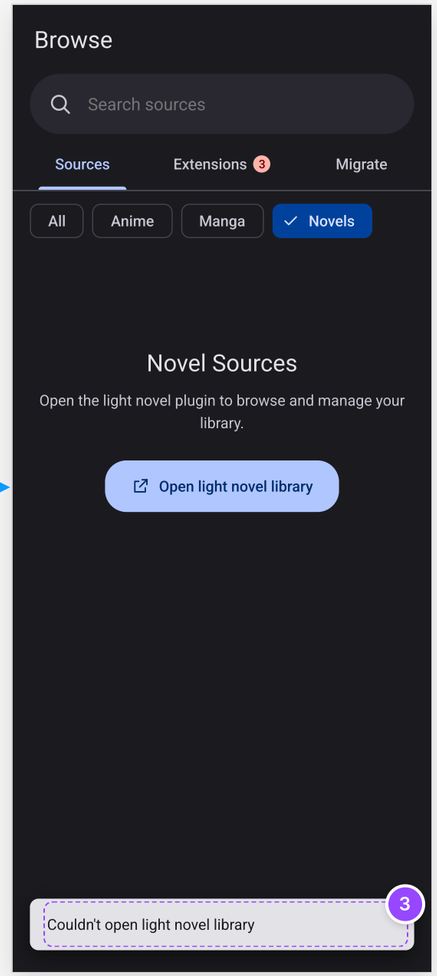

Tap chip

Sources · Novels

Tap

Launch fails

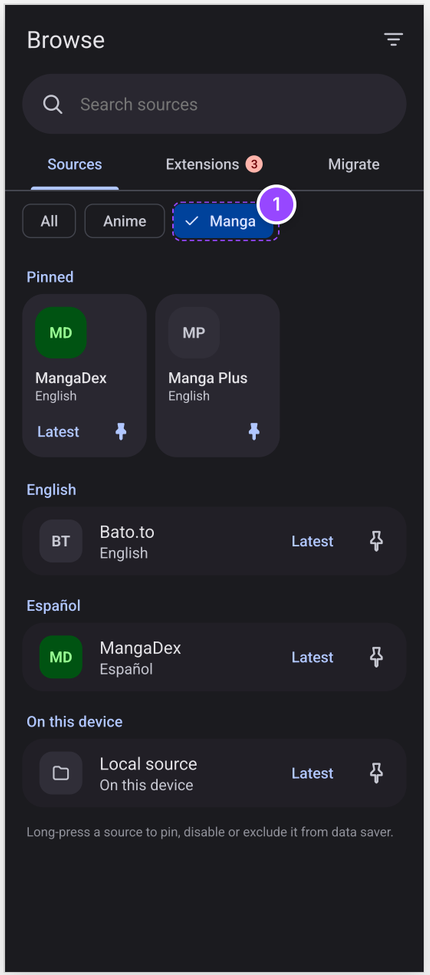

1. Novels shows on Sources only, and only when the plugin is ready. N1
2. The existing launcher panel. Filter hides on this chip. N2
3. A failed launch shows a snackbar. N2

Entry points with no new UI

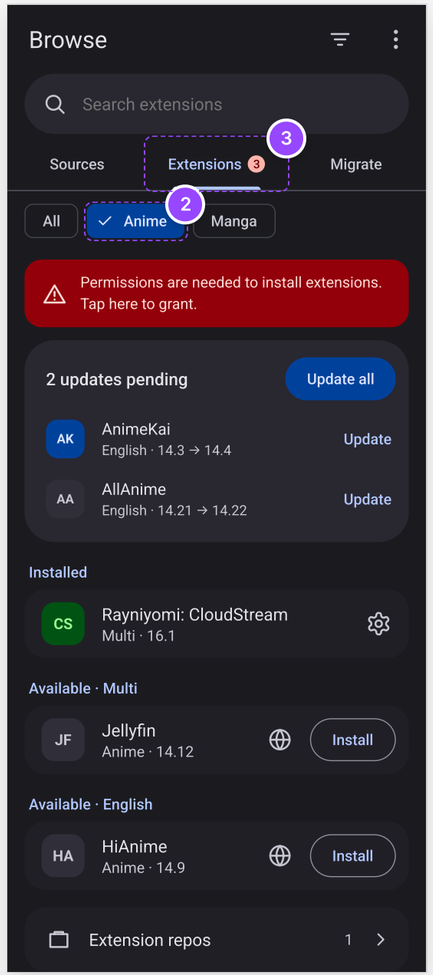

Reselect and notification entry keep working with the new tab and chip model.

Sources · Manga

1 Reselecting Browse opens global search for the selected chip. Rewrite BrowseReselectTargetResolver for tab plus chip. B2

From an update notification

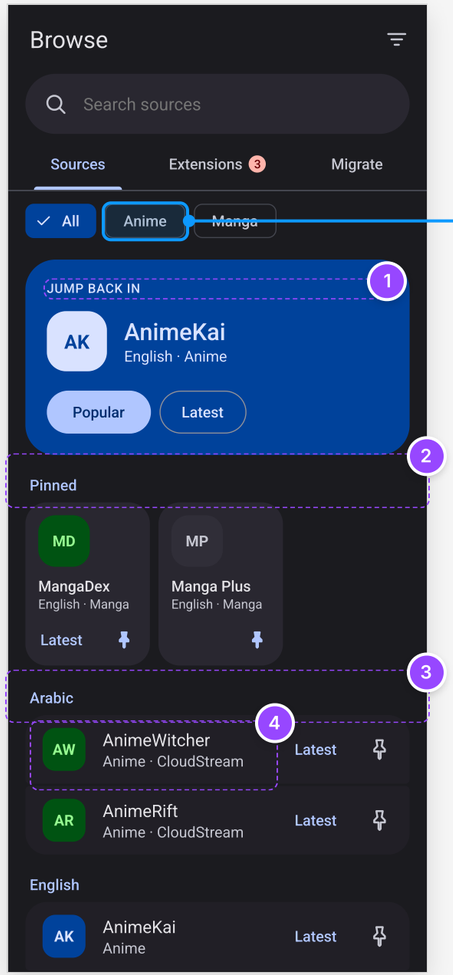

2 An anime extension update notification opens Extensions with the Anime chip. Manga opens the Manga chip. B3

3 Tab.Browse(toExtensions, anime) and BrowseTab.showExtension() route here. B3

Sources layout

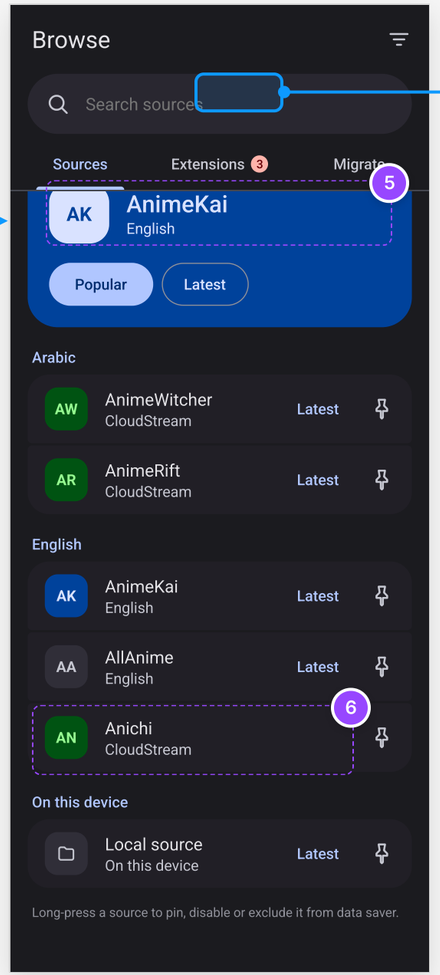

Jump back in, Pinned, then language groups. All mixes anime and manga and names the media type on each row.

Sources · All

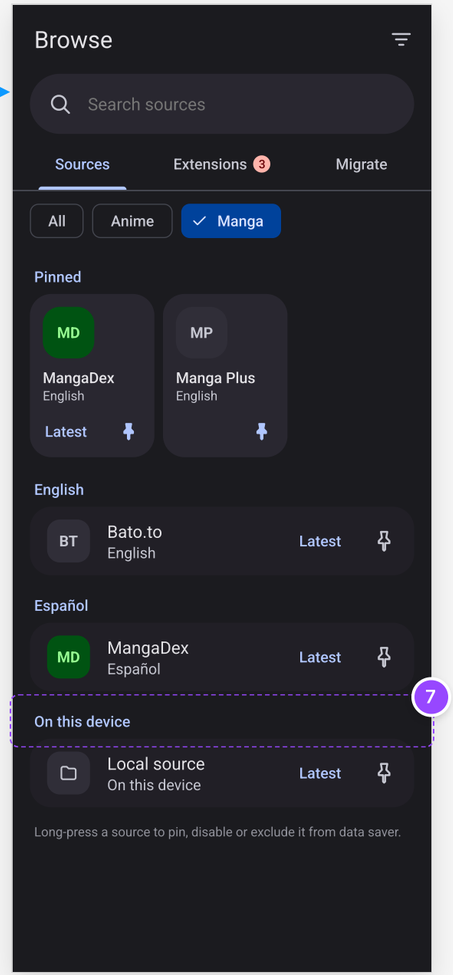

Tap chip

Sources · Anime

Tap chip

Sources · Manga

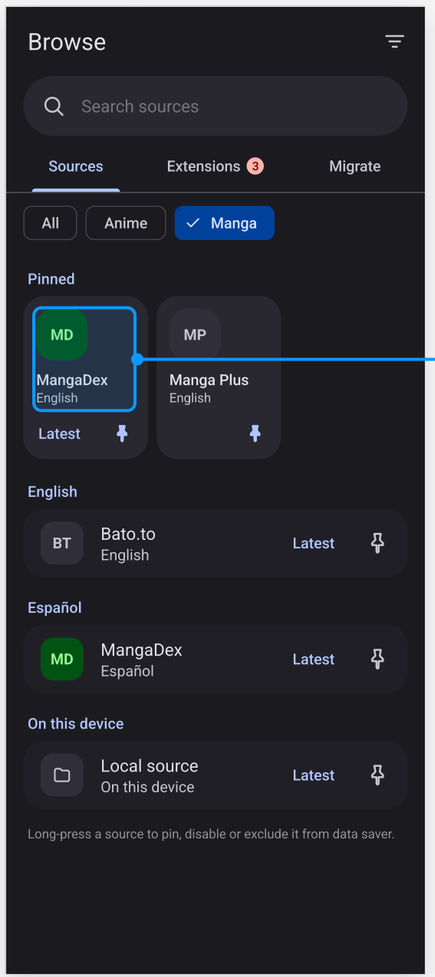

1. The last used source, with Popular and Latest. S1 · S4 · S5
2. Pinned sources as tiles. The pin button unpins. S6
3. Language groups follow. Multi first, On this device last. S1
4. Plugins from the CloudStream runtime say CloudStream. Proposal, drop it if declined.
5. The last used source also stays in its language group. S2
6. No Latest button when the source does not support it. S5
7. Local source shows in every language setting. S3

R1230 #1514 · Sources tab · Flow 2

Long-press a source

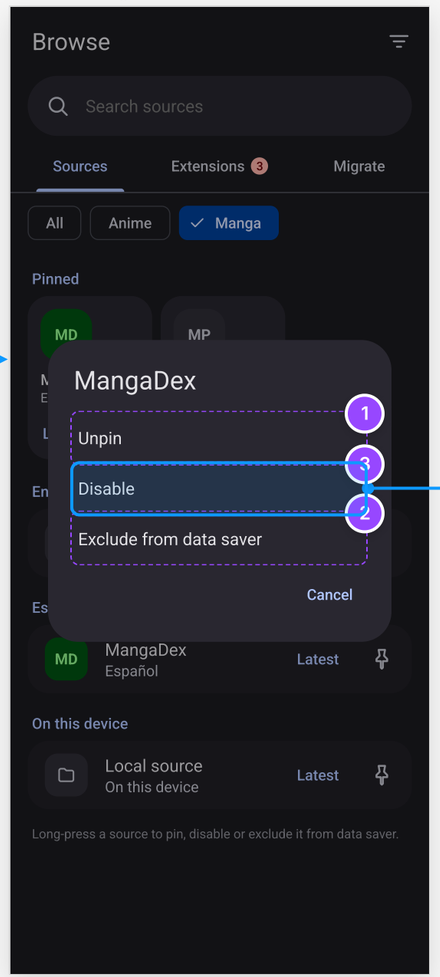

Long-press opens the existing source dialog. Disable hides the source and offers Undo.

Sources · Manga

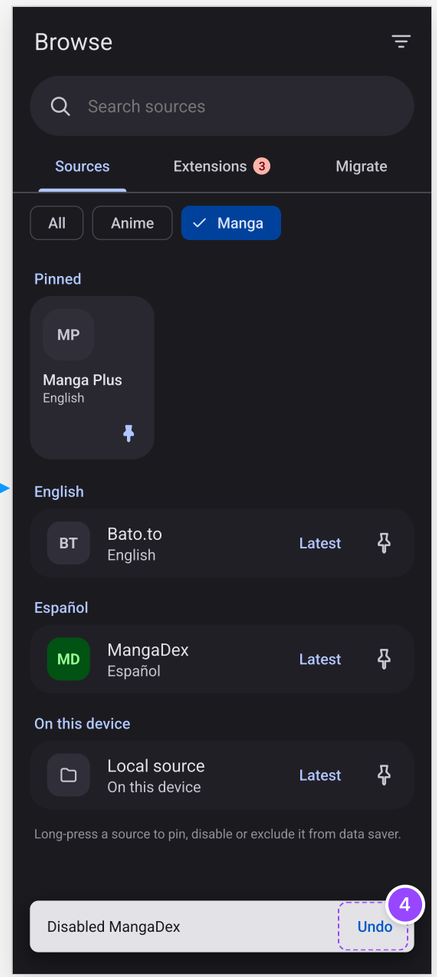

Long-press

Source dialog

Tap

Disabled

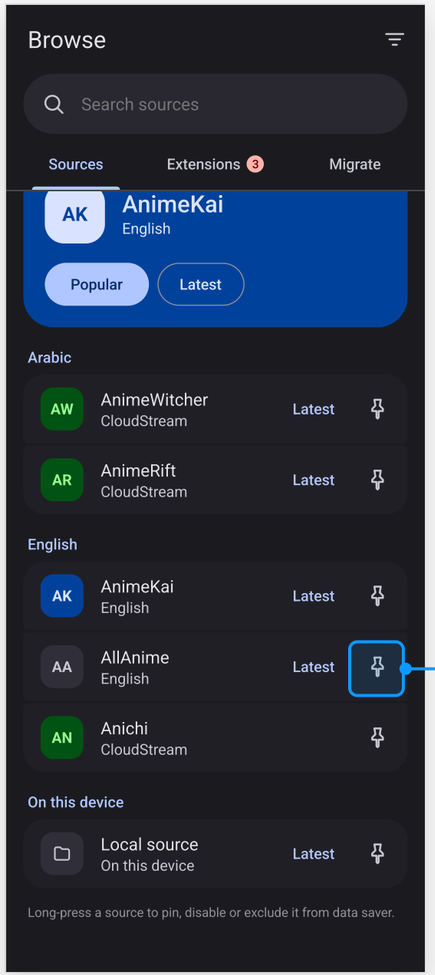

1. Pin or Unpin. S7
2. Manga only, and only when data saver is on. S7
3. Not offered for Local source. S7
4. The source leaves the list. Undo restores it. S3

R1230 #1514 · Sources tab · Flow 3

Pin a source

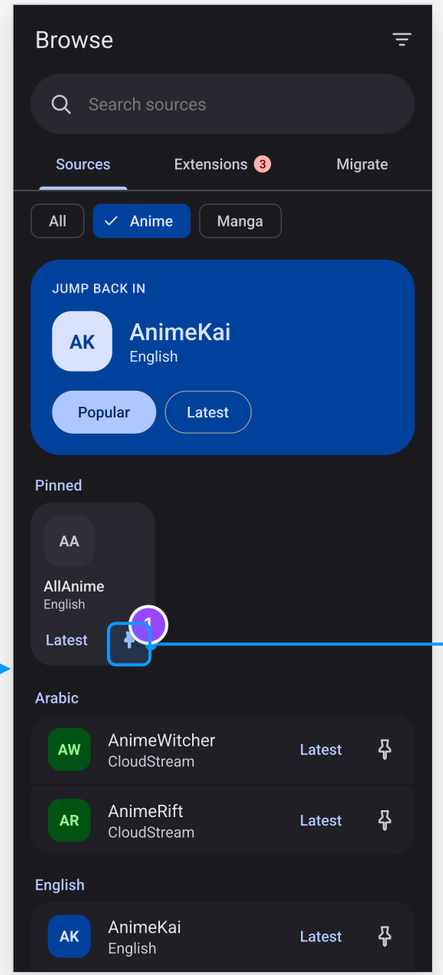

The pin button on a row adds the source to Pinned. Unpin offers Undo.

Sources · Anime

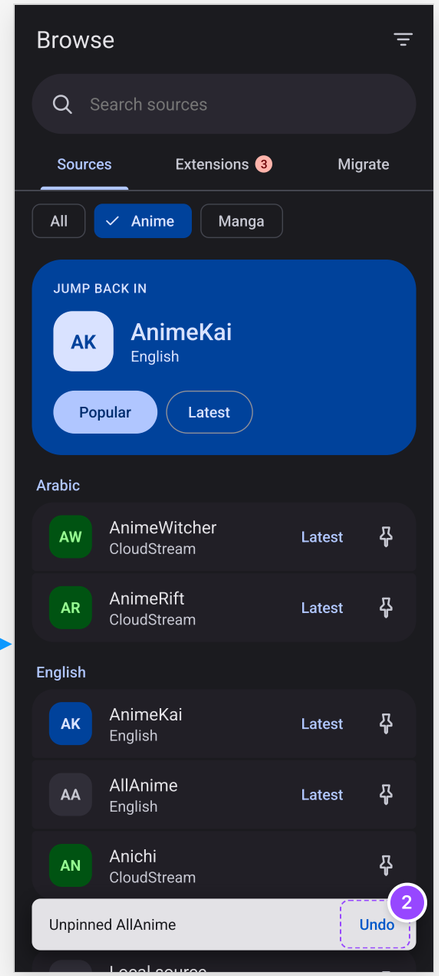

Tap

Pinned

Tap

Unpinned

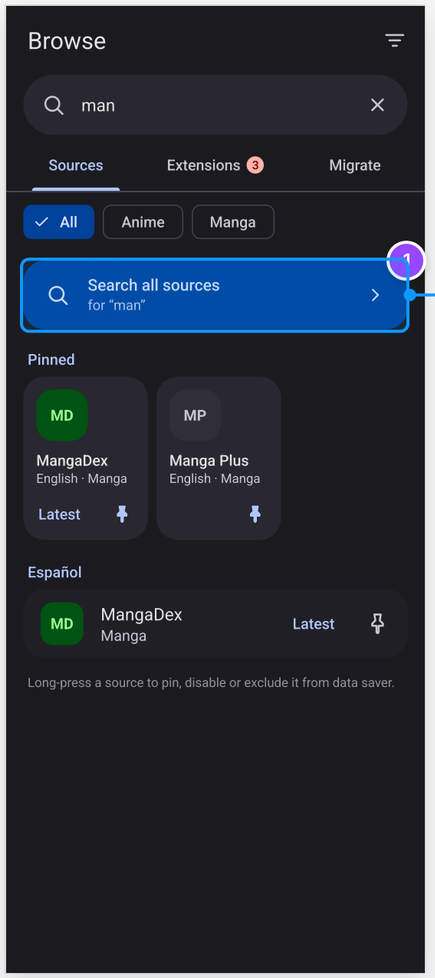

1 AllAnime joins the Pinned row. S6

2 Unpin shows Undo. S6

Search and global search

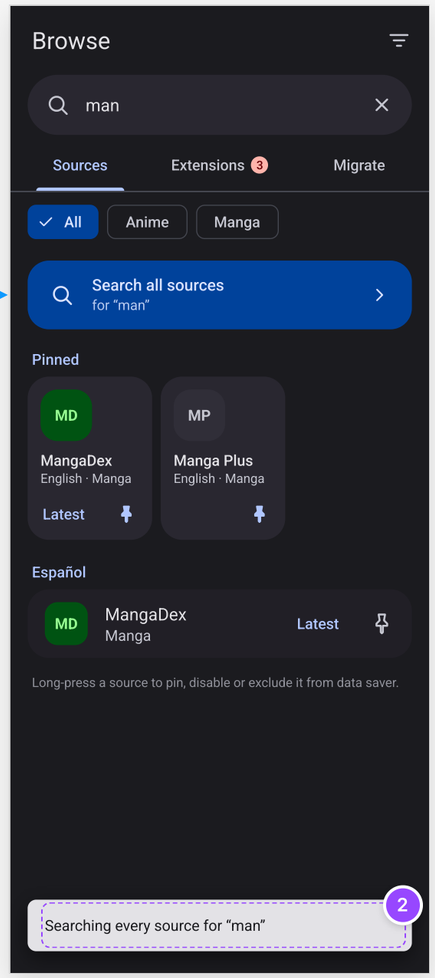

The search field filters the list. A Global search card opens GlobalSearchScreen for the query.

Query "man"

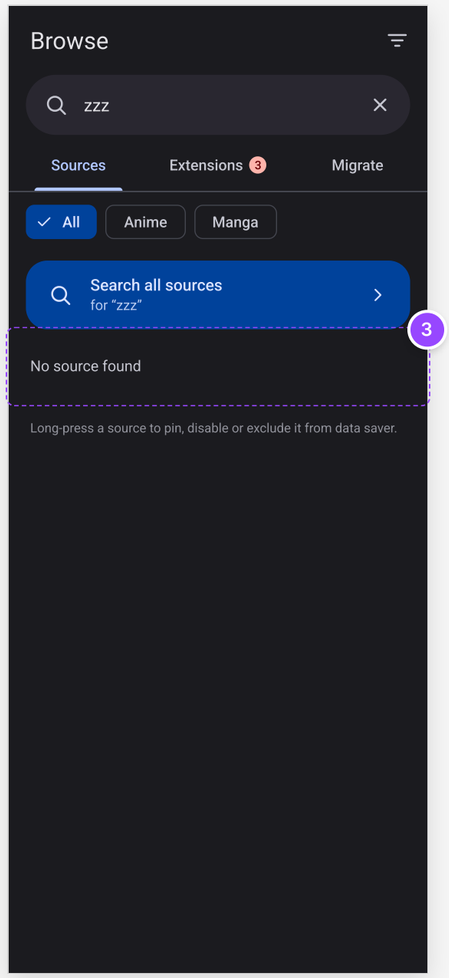

Tap

Global search

No match

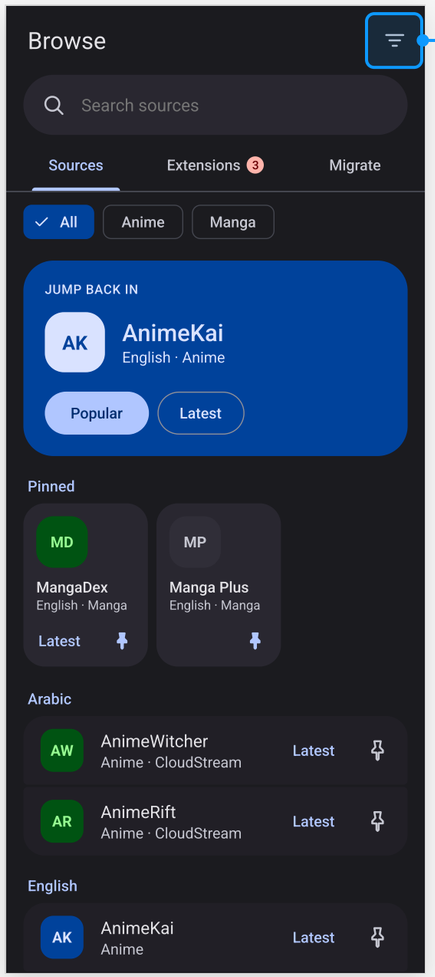

1. Global search for the query and the selected media type. B5
2. Opens GlobalSearchScreen. The prototype shows a snackbar in its place. B5
3. Empty state text stays the same. S8

Sources filter

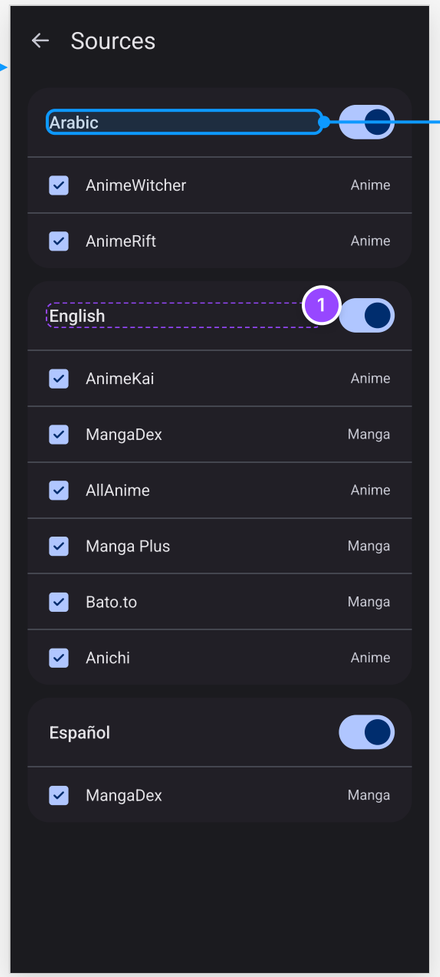

Filter opens the sources filter screen. Under All it lists the languages of both media types.

Sources · All

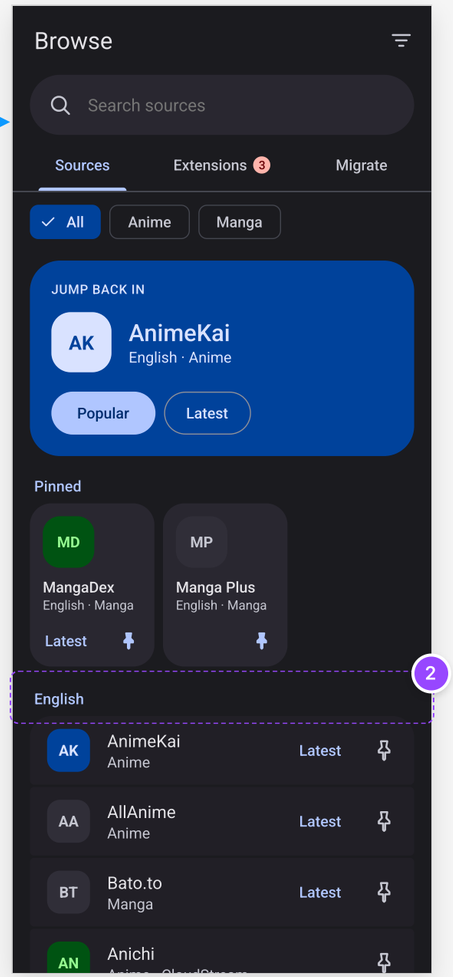

Tap

Sources filter

Turn off

Back on Sources

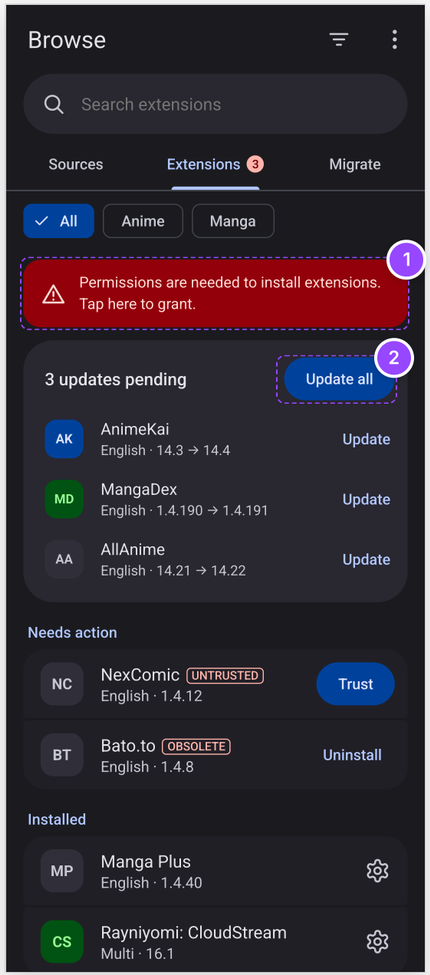

1 A switch per language. A checkbox per source. S9

2 The Arabic group is gone. S3

Extensions layout

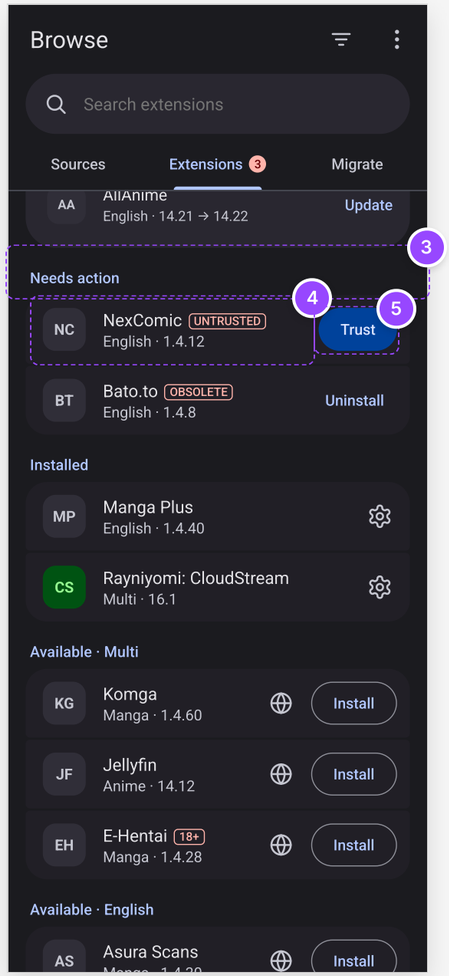

Updates pending, Needs action, Installed, then Available per language. Under All, anime and manga share one list.

Extensions · All

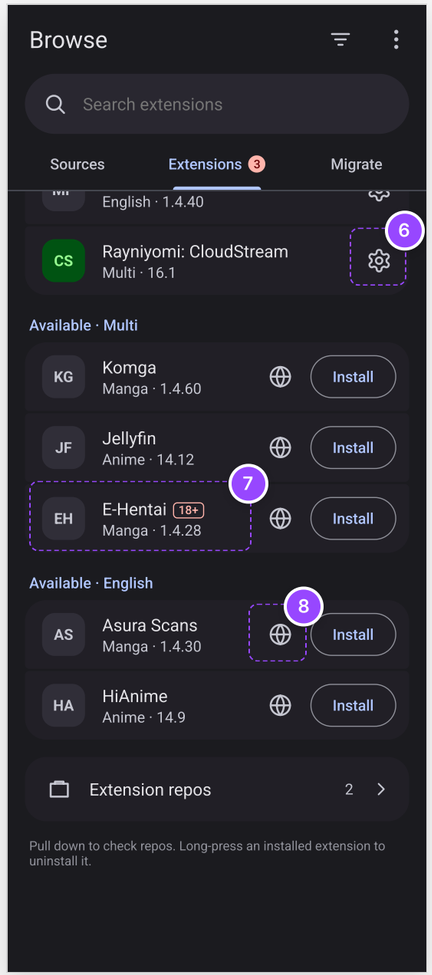

1. Install permission banner. `E10`
2. Update all covers every media type. `E1 · E7`

Needs action

3. New group. Untrusted and obsolete extensions leave Installed. `E1`
4. Labels stay: UNTRUSTED, OBSOLETE, 18+. `E2`
5. Untrusted rows have Trust. Obsolete rows have Uninstall. `E5`

Installed and Available

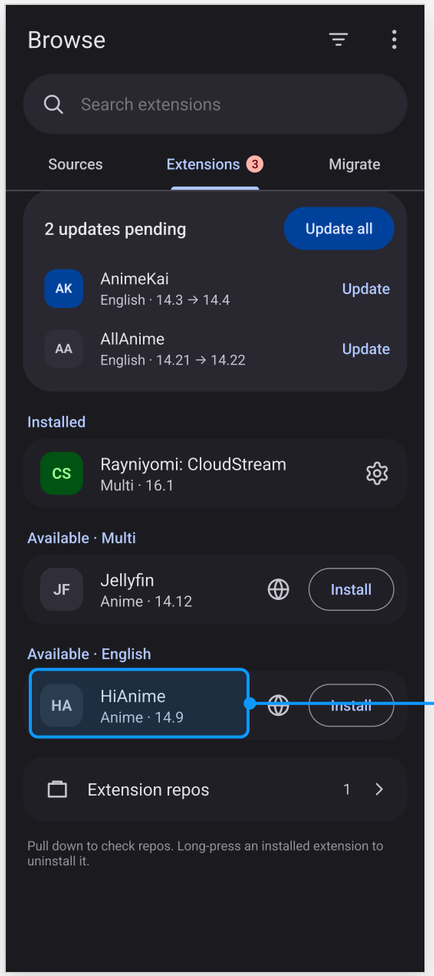

6. Installed rows have a settings button. `E5`
7. Available rows keep the 18+ label. `E2`
8. WebView opens the first source's site. `E14`

Install, fail, retry

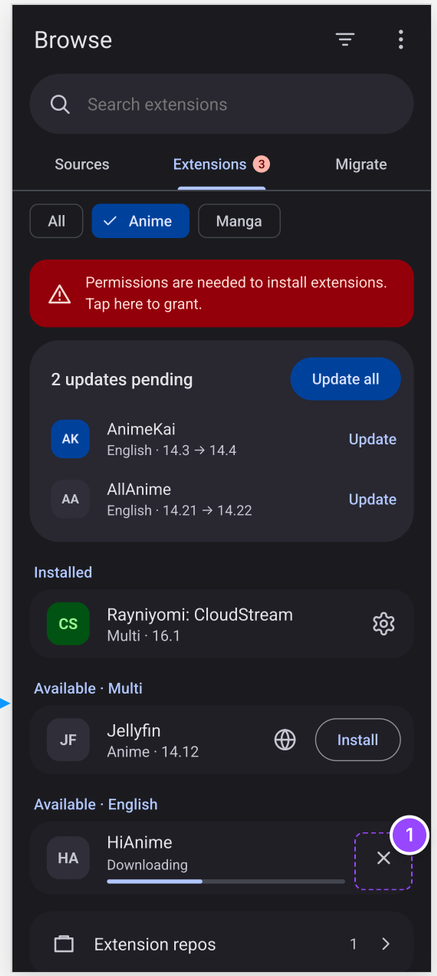

Install shows Pending, Downloading and Installing. An error offers Retry and Dismiss.

Available

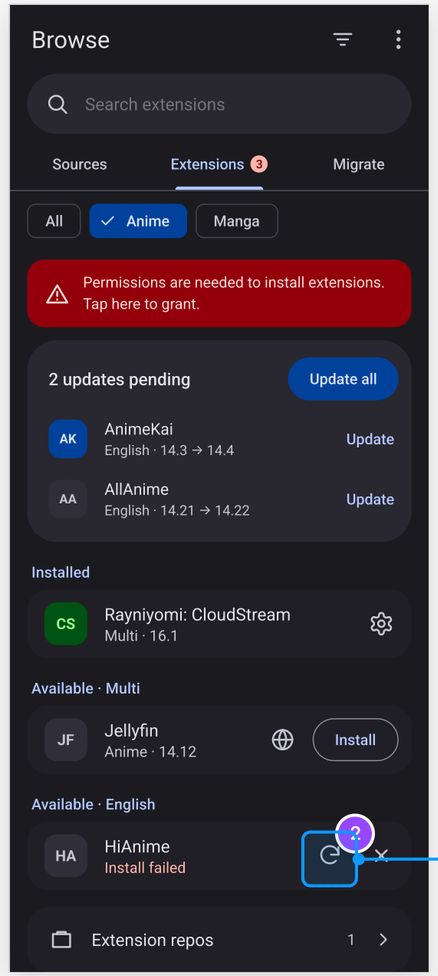

Tap

Downloading

1 Progress with Cancel. E6

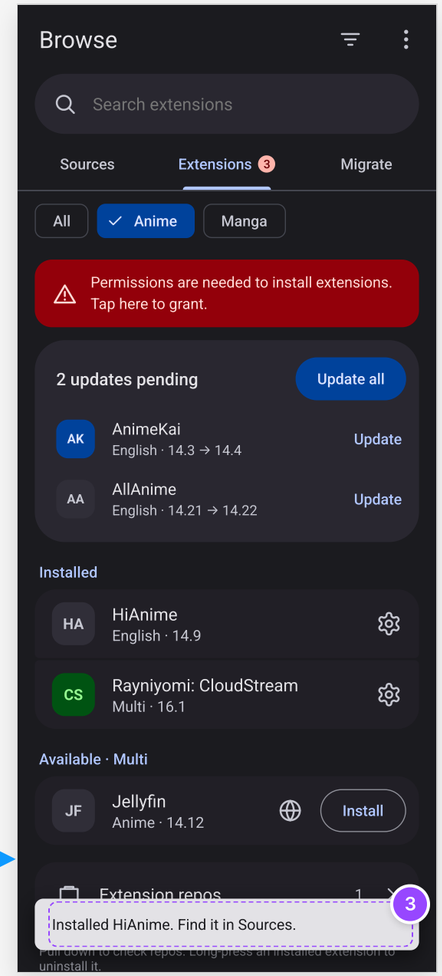

Install failed

Tap

2 Retry and Dismiss. E6

Installed

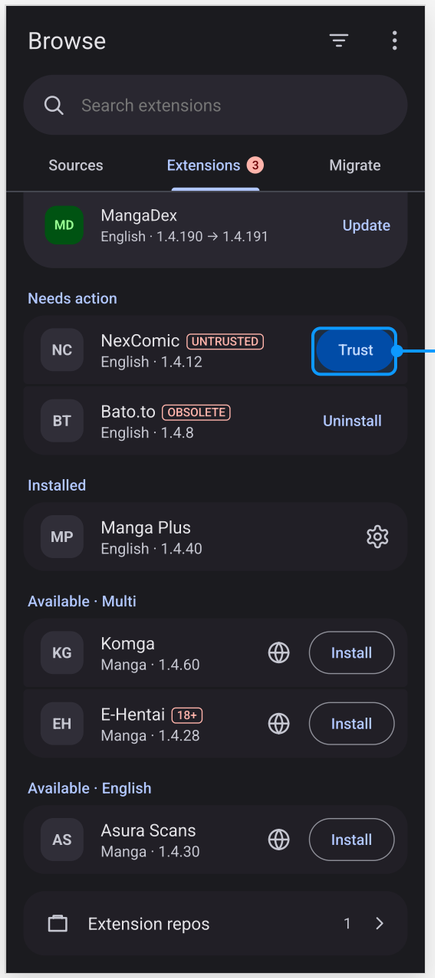

3 The row moves to Installed. E3 · E6

R1231 #1515 · Extensions tab · Flow 3

Trust an extension

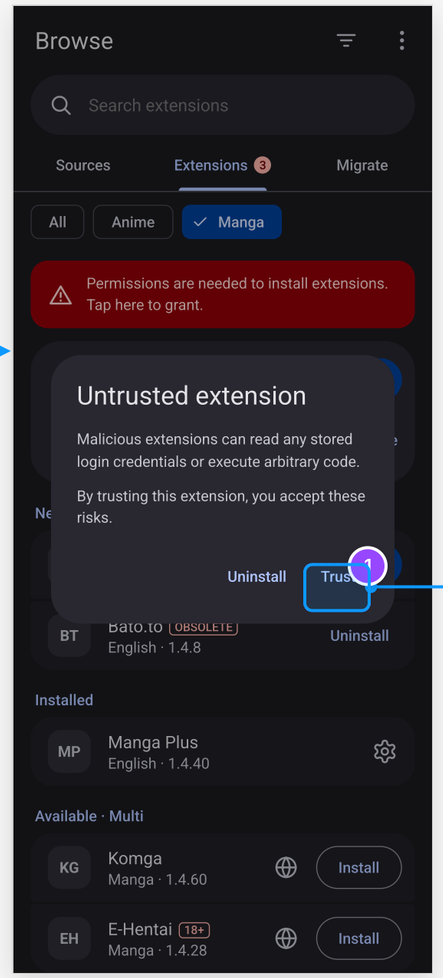

Trust opens the existing trust dialog. A trusted extension moves to Installed and its sources show in Sources.

Needs action

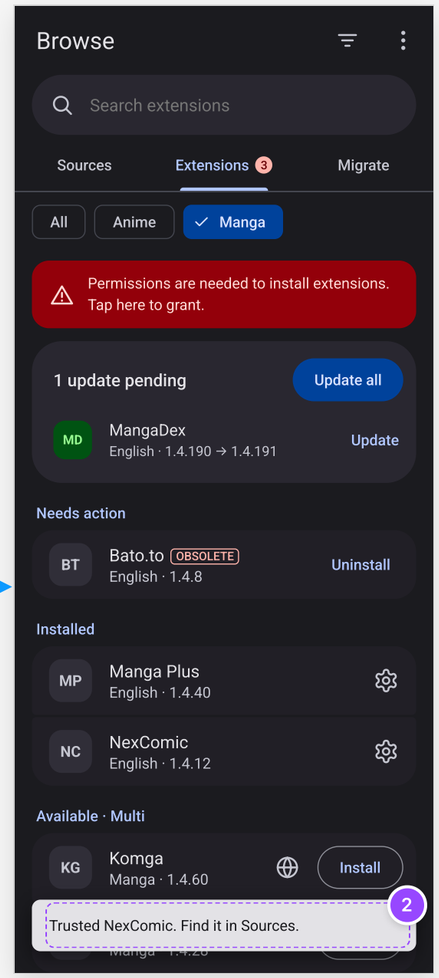

Tap

Trust dialog

Tap

Trusted

1 Same dialog text, Trust or Uninstall. E8

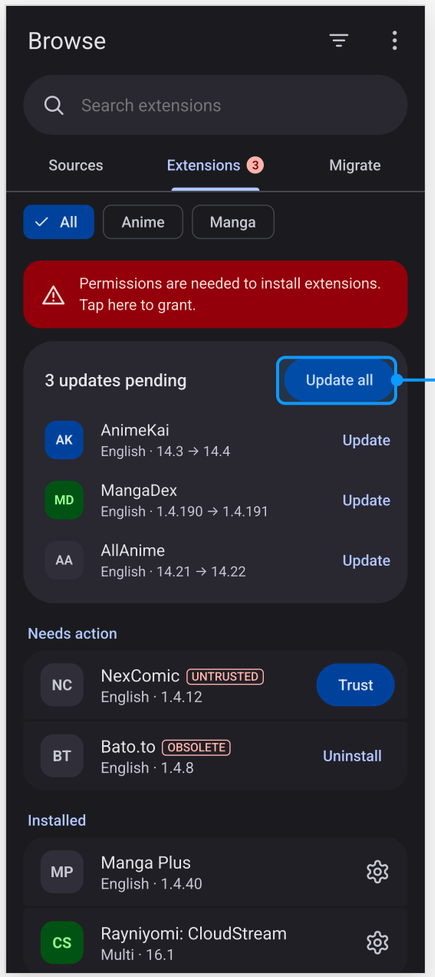

2 NexComic leaves Needs action. E8

R1231 #1515 · Extensions tab · Flow 4

Update all and pull to refresh

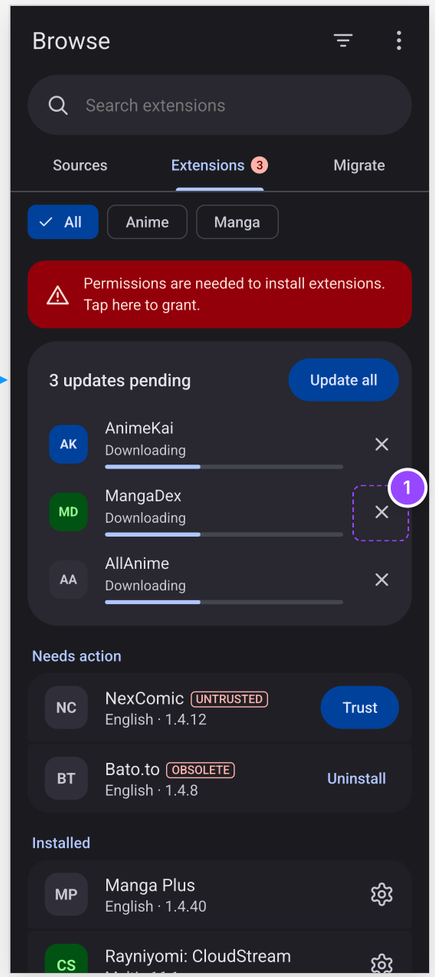

Update all runs every pending update. Pull down checks the repos again.

Updates pending

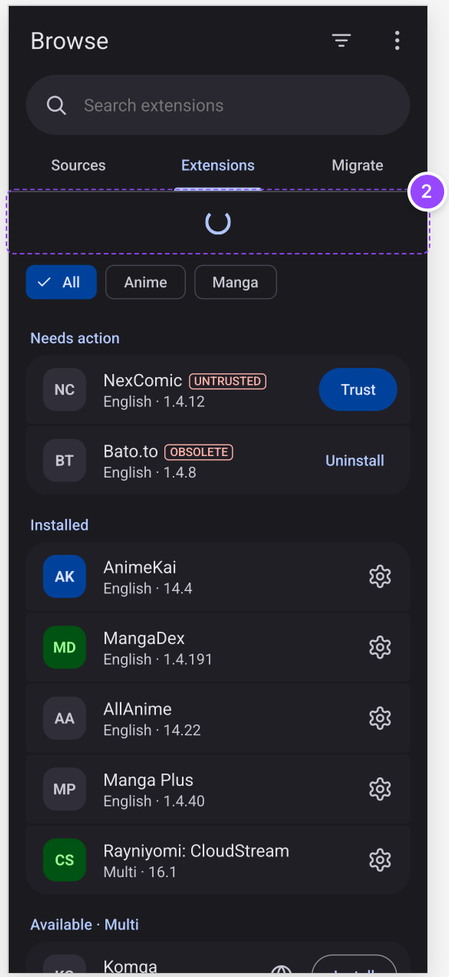

Tap

Updating

1 Each row shows its own progress. E6 · E7

Pull to refresh

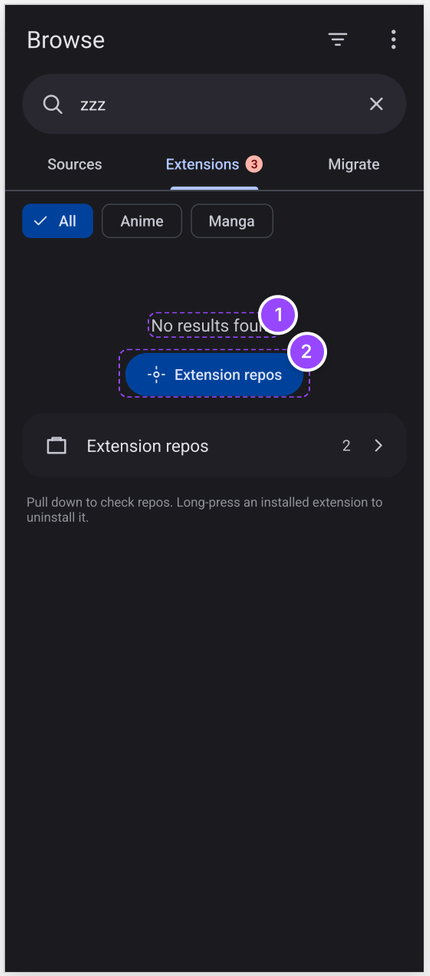

2 Pull down checks the repos. Off while the list loads. E11

R1231 #1515 · Extensions tab · Flow 5

Empty states and filter

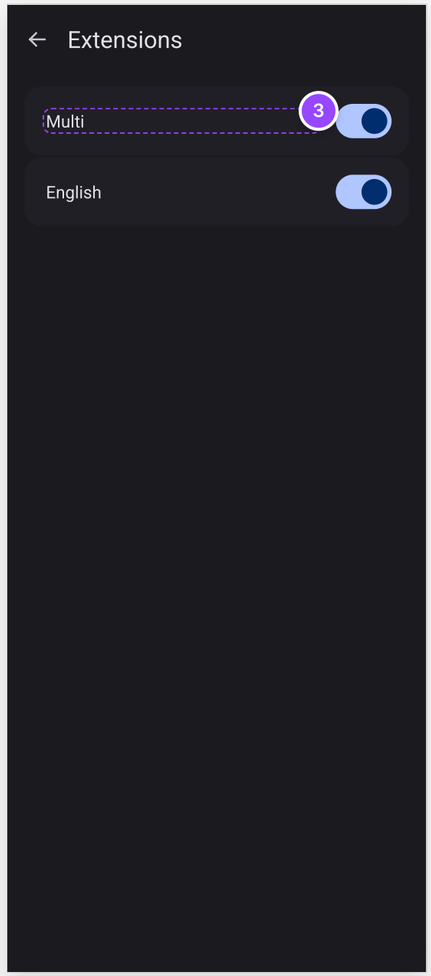

Empty and no-result states keep their text. The language filter stays.

No results

1. "No results found" during a search. "Well, this is awkward" otherwise. E12
2. The empty state links to Extension repos. E12

Extension filter

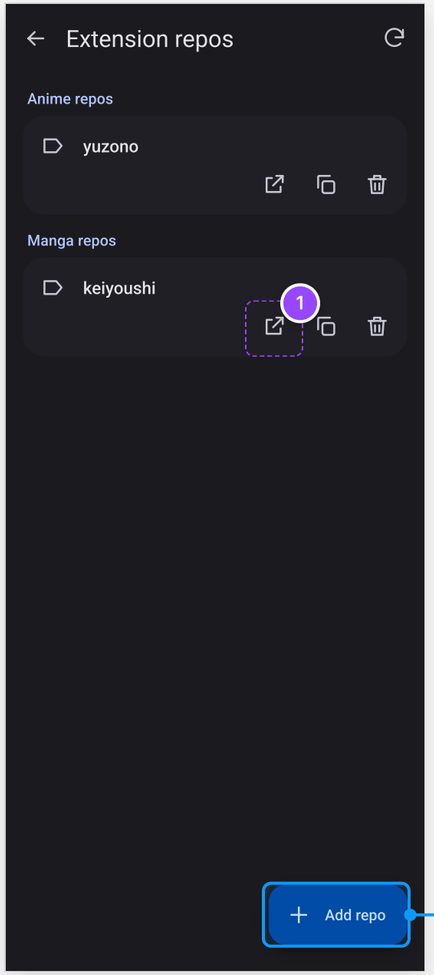

3. A switch per language. E13

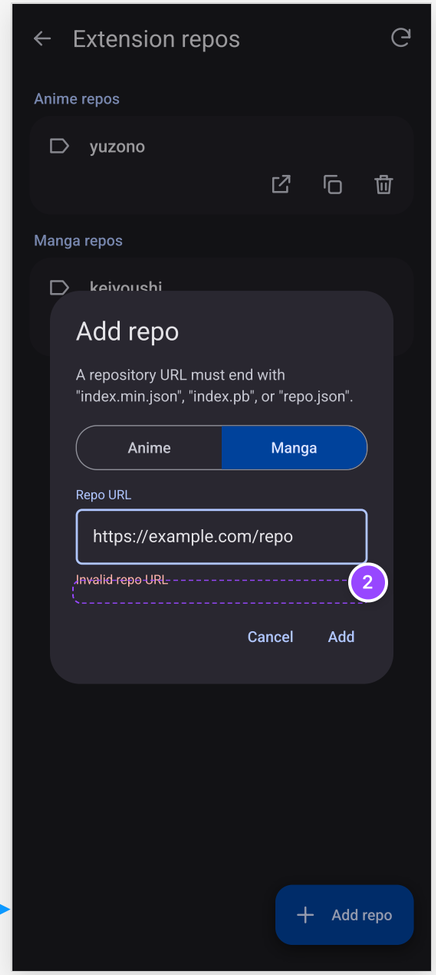

Extension repos

The repos screen does not change. Check that its flows still work from the new overflow.

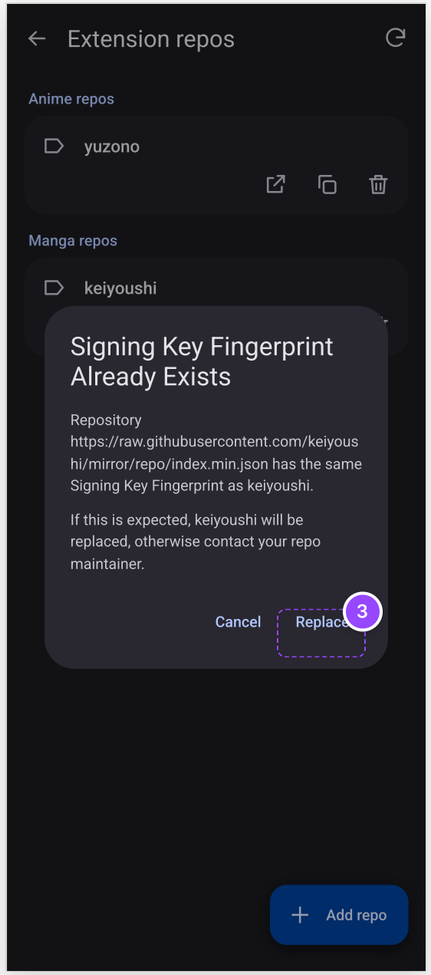

Extension repos

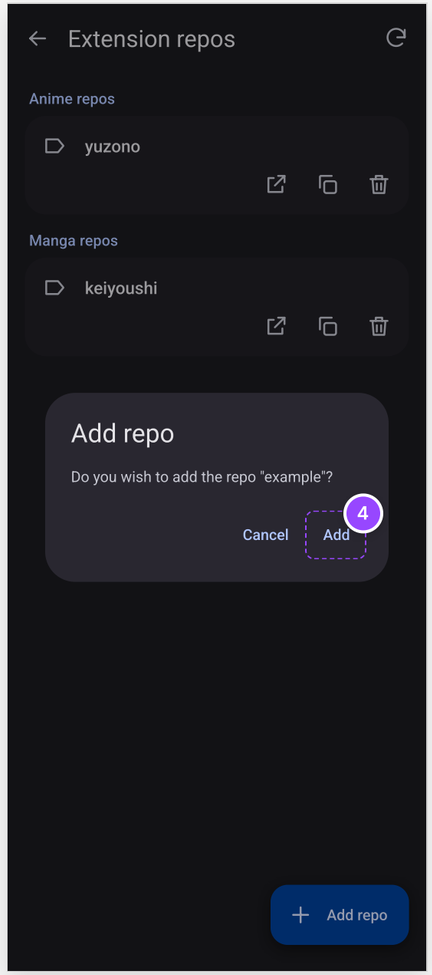

Add repo error

Same signing key

Add-repo link

1 Open in browser, Copy URL, Delete with confirmation. R1 · R2

2 Errors: Invalid repo URL, This repo already exists! R3

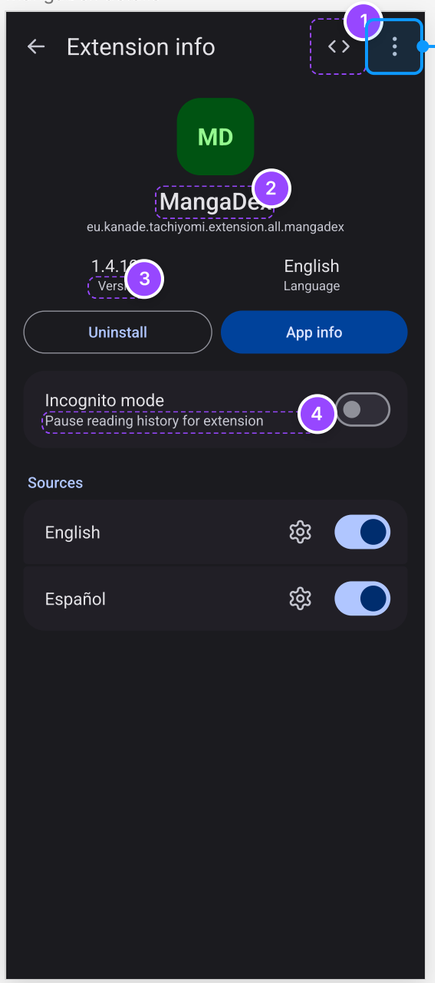

3 Replace dialog for a matching signing key. R4

4 An add-repo link asks first. R5

Extension details

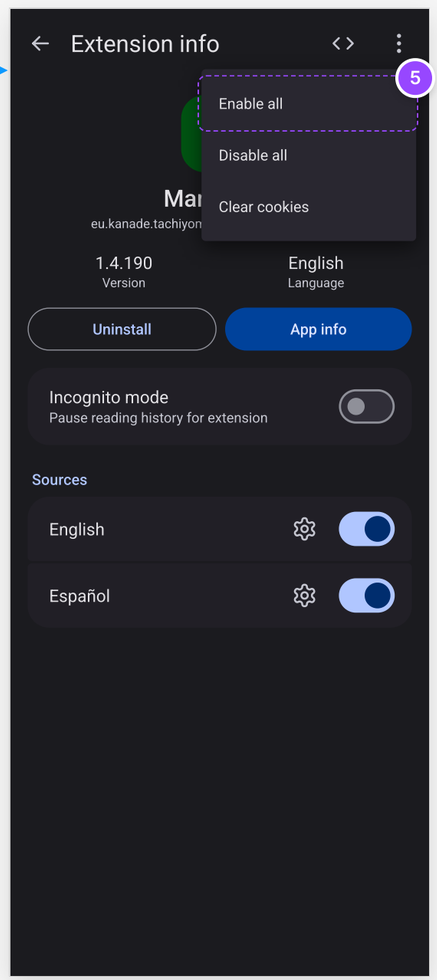

Same actions in a centered header and grouped rows.

MangaDex details

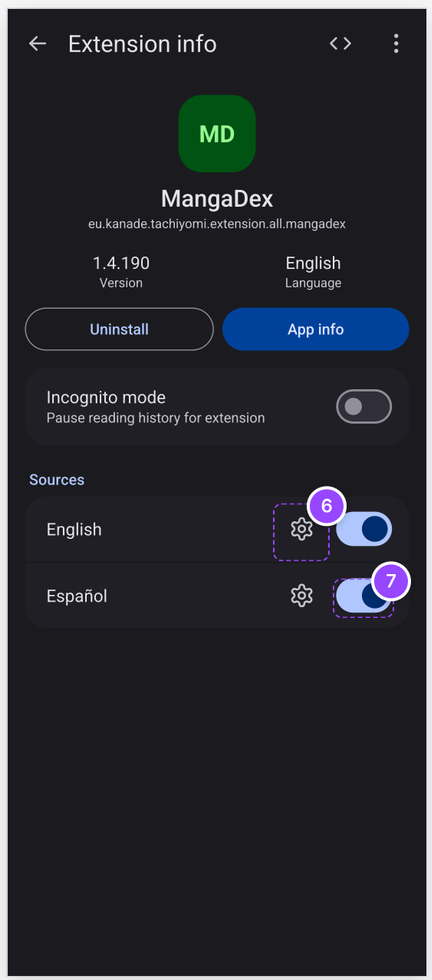

Tap

Overflow

Sources

1. Shown when the repo URL is known. `D1`
2. Centered icon, name and package name. `D4`
3. Version and Language. Age rating for 18+. `D5`
4. Incognito switch. `D7`

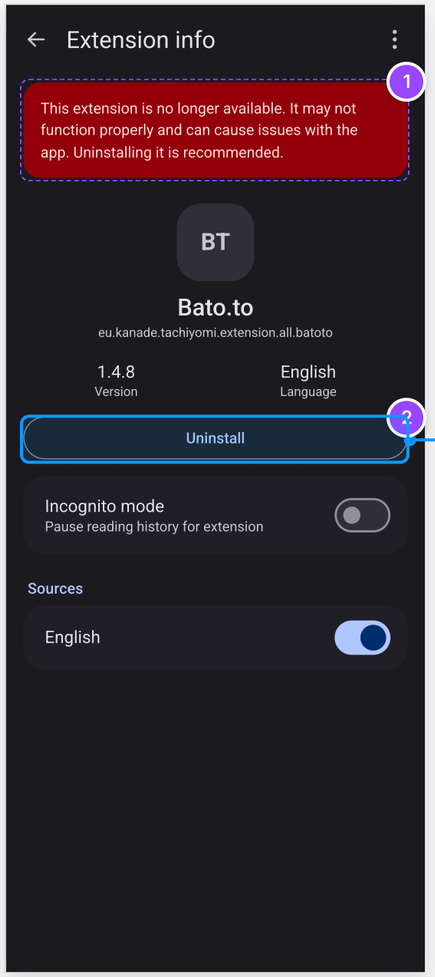

5. Enable all, Disable all, Clear cookies. `D2`

6. Settings for configurable sources only. `D8`
7. A switch per source. `D8`

Obsolete, private and 18+ extensions

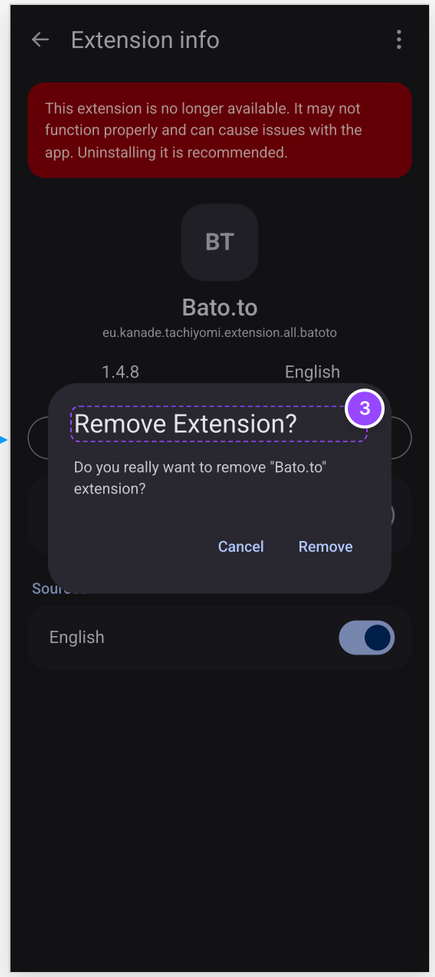

Warnings and confirmation dialogs stay.

Bato.to details

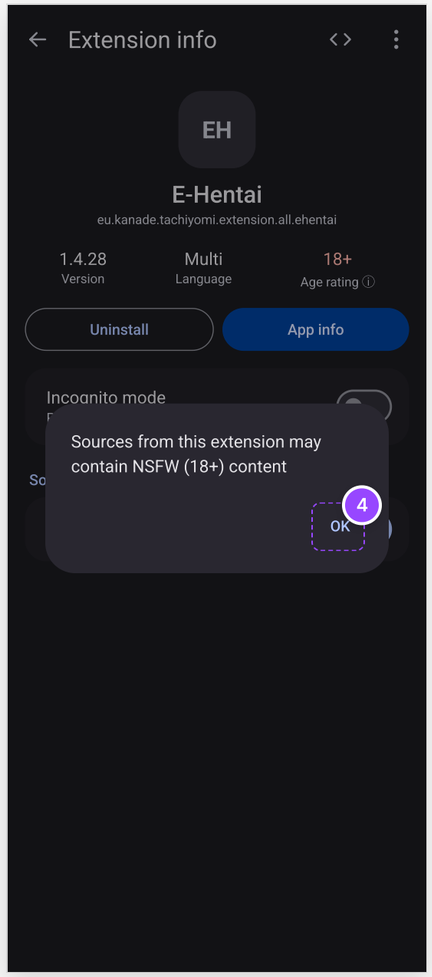

Tap

Remove dialog

E-Hentai age rating

1. Obsolete banner. D3
2. No App info for a private extension. D6

3. A private extension asks first. E9

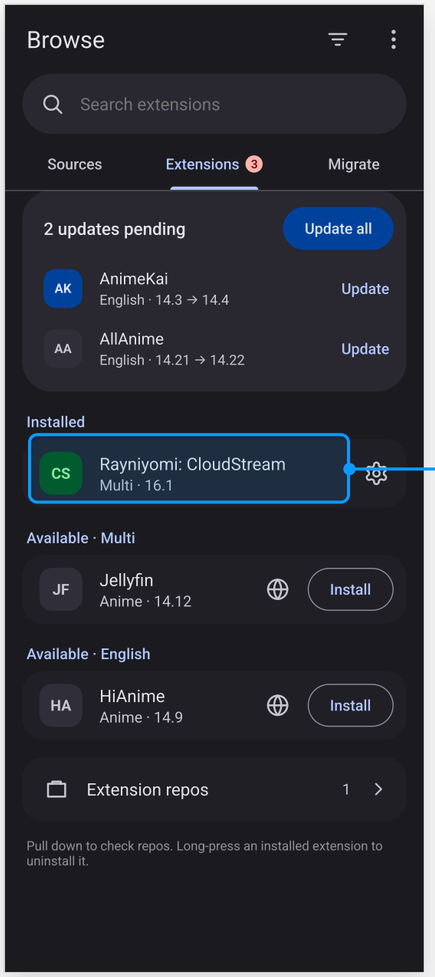

4. Tapping Age rating opens the NSFW warning. D5

R1232 #1516 · Extension details · Flow 3

CloudStream runtime details

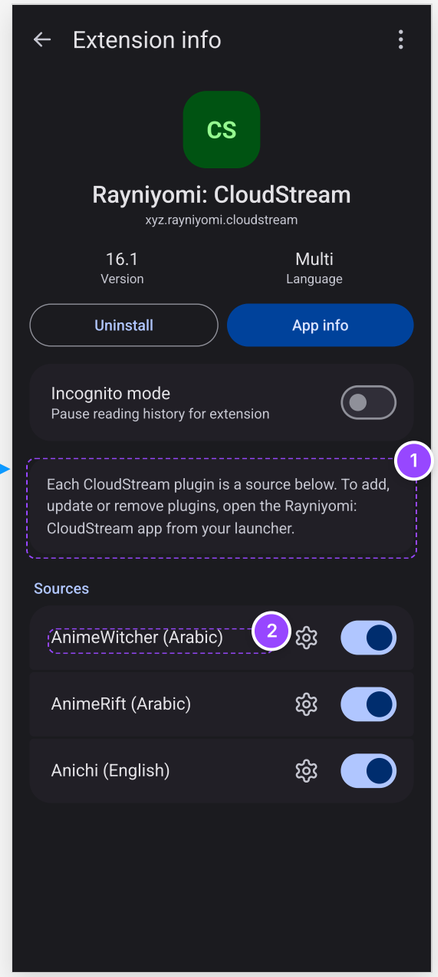

The runtime is one extension. Each plugin is a configurable source. Plugins are managed in the launcher app.

Installed

Tap

CloudStream details

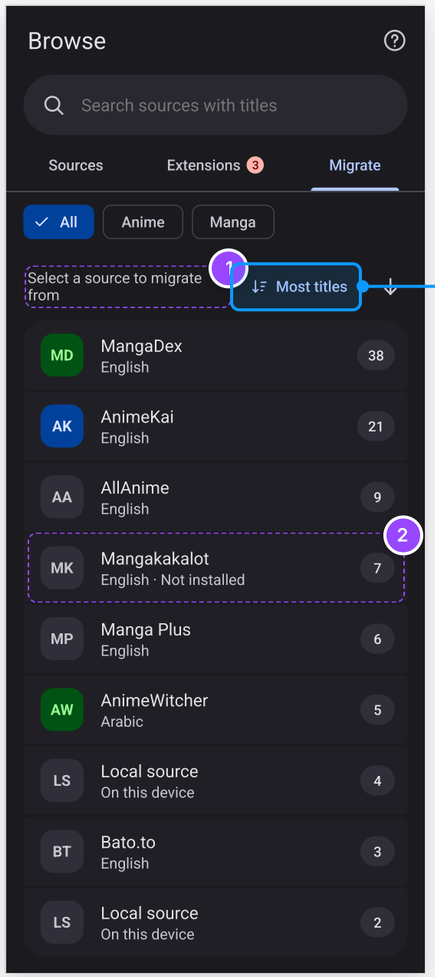

1. Plugin management stays in the launcher app (R1170 decision).
2. Rows name the plugin and language when they differ from the extension. D8

R1233 #1517 · Migrate tab · Flow 1

Sort the migrate list

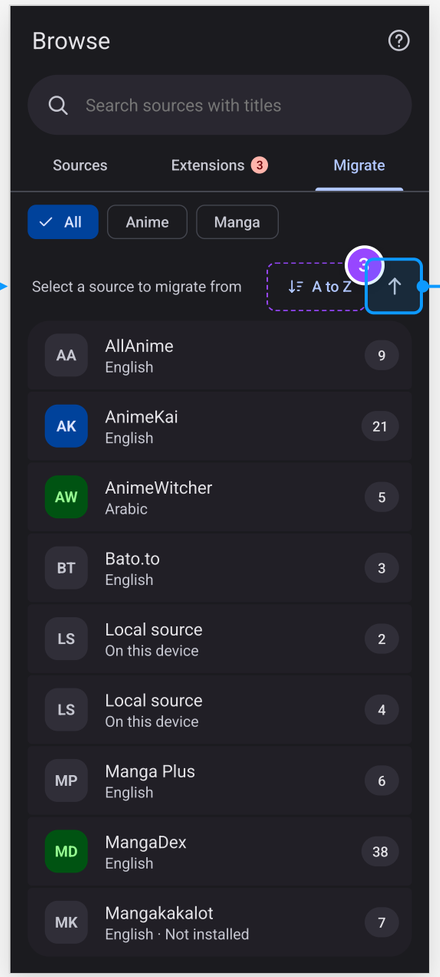

A text button names the sort. The arrow flips the direction. The label always matches the order.

Most titles

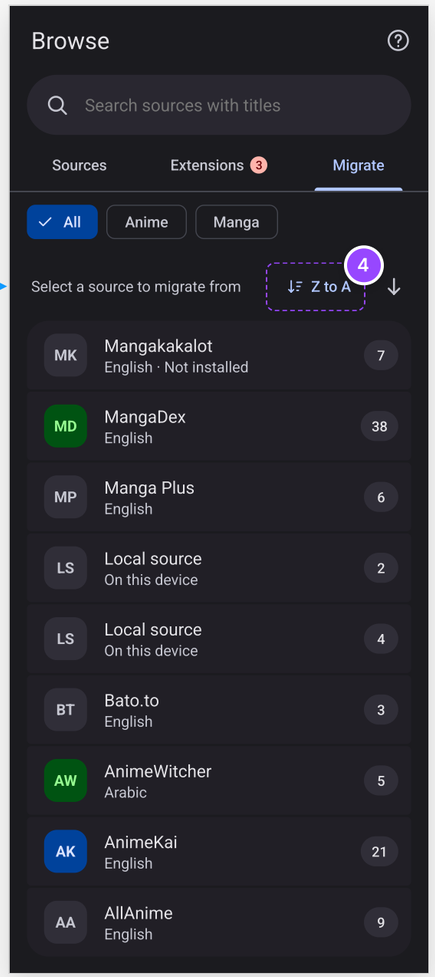

Tap

A to Z

Tap

Z to A

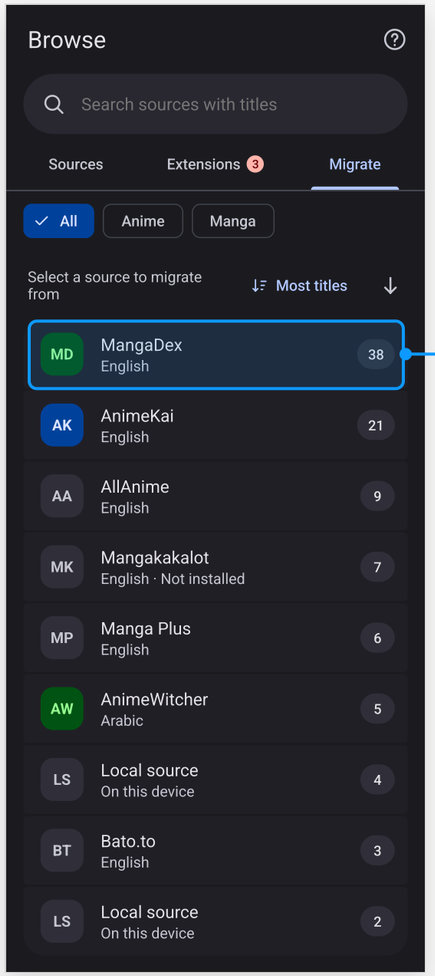

1. Prompt stays. M1
2. Stub sources say Not installed. The badge counts titles. M2
3. A mode change resets the direction. M1
4. Labels: Most titles, Fewest titles, A to Z, Z to A. M1

Open, copy ID, empty library

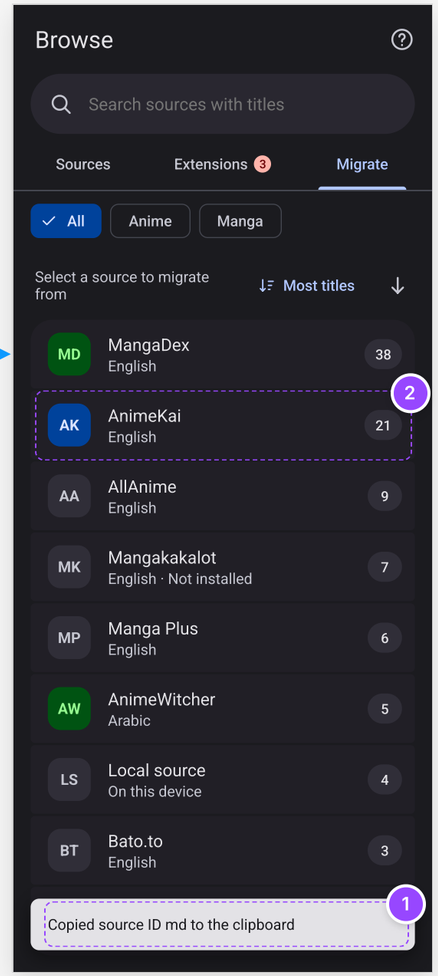

Tap migrates. Long-press copies the source ID.

Migrate

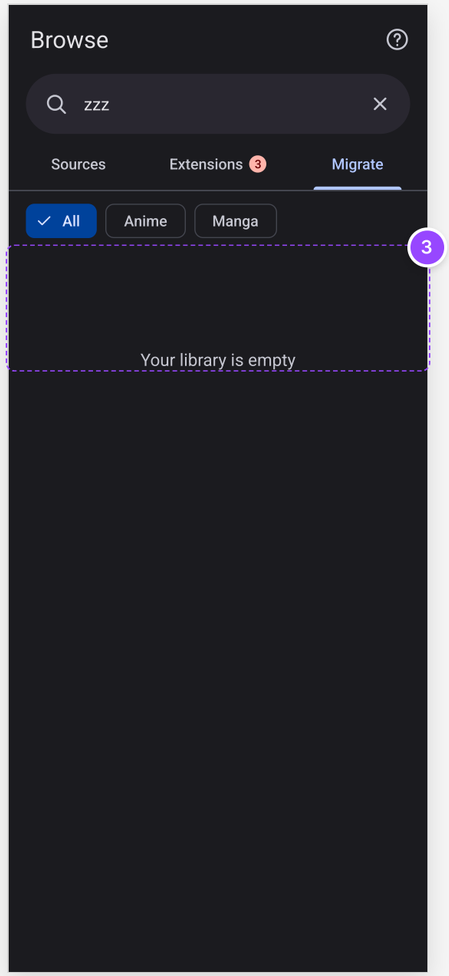

Long-press

ID copied

Empty list

1. Long-press copies the source ID. `M4`
2. Tap opens the migrate screen for the source. `M3`
3. Empty state stays. The prototype reaches it with a search that matches nothing. `M5`
